

Developer Portal

User Guide

Introduction

The HesabPay Developer Portal provides a seamless integration solution for e-commerce and online service providers. By utilizing this portal, businesses can independently integrate with HesabPay, start accepting online payments, and access comprehensive documentation, resources, and APIs to facilitate the integration process.

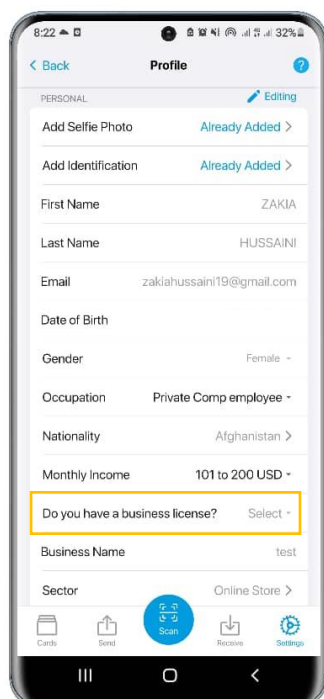

We encourage all e-commerce and online service providers to take advantage of this opportunity and explore the possibilities offered by the HesabPay Developer Portal. This platform is now available for use by anyone with an approved business account.

Here's a step-by-step guide for using the HesabPay Developer Portal:

Sign up and business account registration process:

Anyone with an approved business account can use the developer portal.

- download the HesabPay App.
- After entering your phone number and OTP, you'll be redirected to the profile page.
- Enter Profile Information and your Business Information.
- In the profile section, find the option "**Do you have a business license?**".
- Select "**Yes**" and enter all the details of your business. Then, click on the submit button.
- After submitting your business information, our team will review and verify the details provided.
- Once your business account is approved successfully, you can use and login to the Developer portal.

Access the Developer Portal:

- After your business account is approved, go to your web browser and visit the following URL: <https://developers.hesab.com/login>.
- Use the same credentials (username and password) you used to create your HesabPay business account to log in to the Developer Portal.

Integrate with HesabPay:

- Once you have obtained the API key, utilize it to integrate HesabPay's payment functionality into your platform.
- Incorporate the necessary code into your website or application to enable users to make payments through HesabPay.

Send Transaction Details via API:

- When a user initiates a transaction on your platform, ensure that you automatically send a list of items and their corresponding prices to HesabPay via the API.
- For example, if a user adds items to their cart on your e-commerce platform, automatically send the names of the items and their individual prices to HesabPay.

Redirect to the payment page:

- redirect the paying user to the HesabPay payment page. This page will display the details of the transaction, including the items being purchased and the total amount to be paid.
- The paying user will log in to their HesabPay account and verify their PIN. Once authenticated, the transaction will be automatically processed and paid.

The image shows a payment interface with a blue sidebar on the left and a white main area on the right. The sidebar contains the text "You're Paying Testing", a list of items: "✓ Item 1: AFN 1.00" and "✓ Item 2: AFN 3.00", and a total of "Total: AFN 4.00". At the bottom of the sidebar, it says "Powered by HesabPay". The main area features the HesabPay logo, a form for "Account Number", a form for "Enter your 4-digit PIN" (with four dots), a form for "Note Optional", and a blue "Pay" button.

Explore Documentation:

For more detailed information on how to use the API key with code snippets and examples, navigate to the Documentation section. This will provide you with comprehensive guidance on integrating HesabPay into your platform.

The screenshot shows a web page for HesabPay documentation. The header includes the HesabPay logo and a home icon. A left sidebar contains navigation links: Home, Payment, Developer, and Documentation (with a dropdown arrow). The main content area is titled "Payment Integration" and features a section for "Step 1: Obtaining an API Key". This section explains that an API key is needed for integration and provides instructions on how to obtain it. It includes two sub-sections: "Access API Key Management" and "Generate API Key". At the bottom right, there are links for "About", "Privacy Policy", and "contact us".

Payment Integration

Step 1: Obtaining an API Key

To begin integrating HesabPay into your application, the first step is to obtain an API key. This key is essential as it authenticates and authorizes your application to interact with HesabPay's services. Here's how you can get your API key:

Access API Key Management: Navigate to the Developer section in the dashboard and then click on the API keys tab.

Generate API Key: Follow the instructions to generate a new API key. Remember, this key should be kept confidential and not exposed to the public.
